15. Next steps

Appendix A — Current LOCAZ configuration (from RentHub, 27 Sept 2026)

Appendix B — Glossary

1. Summary

LOCAZ rents cars, vans and trucks in Nice on a self-service basis: customers book, sign, pay and pick up the vehicle without a counter. Until now the fleet and prices were managed in RentHub. That contract has ended, and RentHub was too complex for LOCAZ's needs and missing key payment features.

We will build **LOCAZ's own platform**, made of three parts:

1. **Booking website** (locaz.co/booking) — the customer picks dates, place and vehicle, sees the price instantly, adds options, and only then creates an account and pays.
2. **Admin back office** — for Aziz and his team to manage the fleet, prices, calendar, reservations, customers and company rules.
3. **API** — so the future LOCAZ mobile app and the vehicle devices (remote lock/unlock and GPS tracker) can connect to the same system.

The heavy, sensitive steps — **identity check, documents, contract, e-signature, payment, deposit, check-in/check-out photos and disputes** — are already built in **Contrazy**. LOCAZ will be **Contrazy's first client**: the booking platform hands each confirmed booking to Contrazy, and Contrazy reports back when each step is done. The customer never has to know Contrazy is involved.

This document is based on:

- our meeting of 28 August 2026 (full transcript reviewed);
- a complete read-only review of the LOCAZ RentHub account on 27 September 2026 (all ~110 admin screens, every price list, vehicle, model, service and setting), plus the public RentHub booking page tested with several dates and places;
- LOCAZ's published CGV (v3.0, March 2026), rental contract and privacy policy;
- the current Contrazy codebase.

The full RentHub data was exported the same day (see [Section 12](#)).

2. Goals

Goal	How we measure it
Replace RentHub with a simpler tool LOCAZ fully owns	All daily operations run without RentHub
Let customers book 100% from their phone, 24/7	A booking can be completed on mobile in under 5 minutes, without calling or WhatsApp
Show a correct, transparent price before any account is created	Price shown = price paid; no account needed to search and compare
Secure every rental (identity, contract, deposit, photos)	Every rental has verified ID + licence, a signed contract, a deposit, and pickup/return photos
Grow from ~10 to 30+ vehicles and to other French cities	Adding a city, place, category or vehicle needs no developer
Delegate work to a team	Staff can be invited with limited rights
Be ready for keyless rental and the mobile app	Devices and the mobile app plug into the documented API

Target: pilot launch in Nice at the **beginning of 2027**.

3. Product boundary — who does what

Area	Owner
Landing page, SEO, blog	Existing locaz.co static site (kept; "Book now" goes to the booking platform)
Search, price calculation, availability, options	LOCAZ platform (new)
Fleet, places, categories, prices, services, rules	LOCAZ platform admin (new)
Reservations, fleet calendar, customers, blacklist	LOCAZ platform admin (new)
Identity, documents, contract, signature	Contrazy (existing, small extensions)
Rental payment, deposit hold/capture/release	Contrazy via LOCAZ's Stripe account (existing)
Pickup/return photos, fuel and km readings	Contrazy check-in / check-out (existing)
Damage claims, fines, disputes	Contrazy disputes (existing) + LOCAZ penalty scale
Lock/unlock, GPS, mileage, fuel level	Device providers, connected through the LOCAZ API (Phase 3)
Native mobile app	Mobile developer, using the LOCAZ API (Phase 4)

4. Users and roles

Role	Who	Can do
Super admin	Aziz	Everything, including company settings, prices, users and payments
Administrator	Trusted manager	Everything except billing/Stripe settings and deleting data

Role	Who	Can do
Operator	Fleet staff	Reservations, calendar, pickups/returns, customers, vehicle status. No price or rule changes
Operator assistant	Support / cleaning / delivery staff	View calendar and reservations, record check-in/out, damages and vehicle status
Customer	Renter	Search, book, manage own bookings, documents, payments

Roles match what LOCAZ asked for in the meeting ("Administrator, operator, assistant of operator — that's enough"). Staff are invited by email. Every action is recorded in an audit log. Staff can later be limited to one city or place group, for the national expansion.

5. What we keep from RentHub — priorities

RentHub has about 110 screens. Most were never used by LOCAZ. The table below lists every RentHub area and our decision, based on the meeting and on what was actually configured in the account.

Priority key: **P1** = needed for launch · **P2** = shortly after launch · **P3** = later / optional · — = not needed

5.1 Administration

RentHub screen	What it is	Decision
Company data & configuration	Legal info, tax IDs, operating rules	P1 — simplified company settings (Section 7.10)
Users / Teams	Staff accounts and groups	P1 — Super admin + 3 staff roles (Section 4); teams P3
Blacklist	Reasons to block a customer (Smoker, Dirty, Fuel) with colours	P1
Document types	ID card, passport, proof of address (< 3 months)	P1 — handled by Contrazy
Licence types	International licence / other	P1 — handled by Contrazy
Opening hours (timetable)	Office hours per place	P1 — self-service is 24/7; hours are used for staffed airport/station delivery (kept at launch)
Sources (origins)	App, signage, call, visit, campaigns	— ("we don't need it") — we only store <i>web / admin / app</i> automatically
IBAN	Bank accounts for invoices	— (Stripe payouts)
WhatsApp status	WhatsApp server link (not activated)	P3 — WhatsApp notifications later

5.2 Rental (reservations)

RentHub screen	Decision
Reservations + fleet planning calendar	P1 — the most important screen (Section 7.4)
Manual booking by phone / on site	P1
Disputes	P1 — via Contrazy disputes

RentHub screen	Decision
Cancellation reasons (mandatory)	P1
Unavailability reasons (maintenance, repair...)	P1
Pickup/return checklist	P1 — via Contrazy check-in/out
Lead time (minimum notice before pickup, set to 60 min)	P1
Internal vehicle movements	P2
Review requests	P3
Reservation import, free-sale allocation, broker hooks	—

5.3 Fleet

RentHub screen	What LOCAZ has today	Decision
Place groups	1 group: Nice	P1 (one group per city, for expansion)
Places	Nice Gare, Nice Aéroport, Nice Ville, Nice Collinettes	P1
Brands	Renault, Iveco, Fiat, Mercedes, Toyota, Peugeot, Nissan	P1
Vehicle types	Car, Van, Truck	P1
Categories	7 (Small / Medium / Large car; Small / Medium / Large van; Tipper truck)	P1 — pricing is set per category
Models	8 ("Renault Master or equivalent", etc.)	P1
Vehicles	5 active vehicles with plate and mileage	P1
Additional services	Extra driver, baby seat, hand truck, delivery, 3 insurance levels	P1
Deductible & deposit rules	€1,500 deposit per model; deductibles €1,500 / €2,500	P1
Damage markers	Scratch (X), Dent (O)	P1 — used on the check-in/out car diagram
Vehicle expenses (washing, energy, service, insurance, tyres)	Cost types	P2
Deadlines (insurance, MOT, service dates)	Calendar of vehicle deadlines	P2 ("we don't care for now"; useful reminders later)
GPS tracking map	Not connected	P3 — replaced by our device integration (Phase 3)
Damage report templates, damage categories/fees	Case-by-case, not set up	— (use the CGV damage scale inside disputes)
Vehicle owners/suppliers, ACRIS codes, custom status 1–4, alarms	Empty	—

5.4 Pricing

RentHub screen	What LOCAZ has today	Decision
Price lists	Daily weekday, daily weekend, hourly weekday, hourly weekend	P1 — daily and hourly, weekday and weekend
Rental rates per category	1–6 day prices, km included, extra km	P1
Packages	Week (7 days, 700 km), Month (29–31 days, 3,000 km)	P1 — week and month package for every category
Service prices	Daily or fixed price per category	P1 — same prices for all categories by default, editable per category
One-way (transfer) fees	€59 between places	P1
Dynamic pricing (seasons, demand)	Not set up ("I will set it up myself")	P2 — simple rules the admin can manage
Advanced dynamic pricing (night rate, web discount...)	Not set up	P3
Coupons	None	P2
Damage fees	Not set up	— (CGV scale in disputes)

5.5 Other RentHub modules

Module	Decision
Customer database (contacts)	P1 — customer list with documents, bookings, blacklist
Invoices	P1 — simple invoice/receipt PDF per rental. Full accounting (cash book, fiscal archive, purchase invoices) — not needed
Payments / due dates	P1 — handled by Contrazy + Stripe
Leads (CRM), marketing campaigns, message templates	P3
Upselling groups	P3
AI credits / document scanning	—
Car-sharing, online check-in, desk signature (not activated in RentHub)	Covered by our own booking flow + Contrazy

6. Customer booking journey

The customer never creates an account before they have chosen a vehicle and seen the price. This keeps the site free to browse, and avoids empty accounts ("like e-commerce").

6.0 Today's RentHub booking page (reviewed 27 Sept 2026)

For reference, the current RentHub booking engine works like this:

1. **Search form:** pickup place, return place, type, category, minimum seats, dates and times (30-minute slots).

2. **Results:** one card per model with fuel, seats, gearbox, doors and air-con, the price list used, the total price, the km included and the extra km price. Packages appear as a separate "fixed price" card next to the daily price.
3. **One-page checkout:** options (extra driver, baby seat, delivery, protection), personal details (name, email, mobile, address), card details (Stripe), marketing opt-in, CGV and privacy checkboxes, coupon code, summary. Two buttons: "Confirm and pay online" or "Request a quote".

What we keep: the dates-first search, the clear result cards, and live option prices.

What we change:

- The customer gets a real account and verified identity, which RentHub does not do.
- The deposit and cancellation rules are shown before payment. Today the checkout never mentions the €1,500 deposit.
- The best price (package or daily) is chosen automatically, so two prices are never shown for the same car.
- The contract is signed before pickup.

6.1 Steps

#	Step	What happens	Built in
1	Search	Pickup place, return place (default: same), pickup date & time, return date & time. Visible straight away on the landing page (sticky box while scrolling).	LOCAZ
2	Results	Available categories with photo, "Model or equivalent", seats, gearbox, fuel, volume (vans), km included, total price and price per day. Sorted by price. Unavailable vehicles shown greyed out.	LOCAZ
3	Options	Protection level (Standard included, Comfort, 0 Franchise), extra driver, baby seat, hand truck, airport/station delivery. Price updates live.	LOCAZ
4	Summary	Full breakdown: rental, options, one-way fee, km included, extra km price, deposit amount, cancellation rules. Accept CGV and agree that the card is saved for amounts due after the rental (fines, damages).	LOCAZ
5	Create account	Email + phone (verified by code), or Google. Name, date of birth. Minimum age check.	LOCAZ
6	Verification & contract	Driving licence (front/back), ID or passport, selfie, proof of address if requested. Contract generated with booking details and signed on the phone.	Contrazy
7	Payment	Rental paid in full by card (3-D Secure). Deposit authorised on a card in the renter's name. The card is saved securely by Stripe for later charges.	Contrazy (Stripe)
8	Confirmation	Booking confirmed by email (and later WhatsApp/SMS), with place, time and instructions.	LOCAZ
9	Pickup	Customer goes to the vehicle, does the pickup check (photos, fuel, km), then unlocks it (key box / app, Phase 3).	Contrazy check-in (+ devices)
10	Return	Return check (photos, fuel, km). Extra km, fuel and penalties are calculated. Deposit released or partially captured.	Contrazy check-out

If verification or payment fails, the vehicle is held for a limited time (e.g. 30 minutes, adjustable) and then released.

6.2 Booking rules (from LOCAZ CGV v3.0)

Rule	Value	Configurable
Minimum age	21 years	Yes
Licence held for at least	1 year (confirmed; the website FAQ will be corrected from "2 years")	Yes
Maximum rental length	30 consecutive days	Yes
Book up to	6 months in advance	Yes
Minimum notice before pickup	60 minutes (RentHub setting)	Yes, per place/category
Simultaneous bookings per customer	1	Yes
Minimum booking price	€35 incl. VAT (RentHub setting)	Yes
Cancellation refund	> 24 h before: 100% · < 24 h: 50% · < 1 h: 0% · cancelled by LOCAZ: 100% · fraud/invalid documents: 0%	Yes
Extension	Requested in the app before the end; accepted only if the vehicle is free; paid immediately	Yes

6.3 Customer account area

- Upcoming, current and past bookings; download contract and invoice.
- Request an extension, cancel (with the refund rule shown), add a driver.
- Saved documents (re-used for the next rental while valid) and saved card.
- "Request a quote" without payment, for professional customers (**P2**).
- Language: French and English at launch (Italian as on the landing page — **P2**).

7. Functional requirements — LOCAZ platform

7.1 Price engine

Prices are set **per category, not per model**: a Renault Master and an Iveco Daily in "Large van" cost the same. This was agreed in the meeting and matches the RentHub setup.

Price list selection

- *Weekday* and *weekend* daily price lists; the weekend list applies when the rental falls on a weekend.
- *Hourly* price lists (weekday / weekend) are offered online **from launch** (P1). RentHub has them but never showed them to customers. Hourly rental can be switched on or off per category.
- Tolerance: a rental of 24 h + up to 1 h counts as 1 day (RentHub setting). Hourly tolerance: 29 minutes.

Price per duration

- A total price is set for 1, 2, 3, 4, 5 and 6 days (each duration can have its own total, e.g. Medium van: 1 day €70, 2 days €139.20, 3 days €205.20...).
- Optional longer tiers (e.g. Small car: from 7 days €31.92/day, from 30 days €30/day).
- Beyond the last tier, the price is **the daily rate of the last tier × number of days**. This is how RentHub calculates it today, e.g. Large car 10 days = 10 × €45 = €450.

- **Packages** replace the daily price when the duration matches: *Week* = exactly 7 days, 700 km included; *Month* = 29–31 days, 3,000 km included. Every category has both packages. The customer always gets the **cheapest valid price**, shown as one price.
 - RentHub today shows the week package and the daily price side by side. For the truck, the package (€672) is more expensive than 7 daily prices (€595).
 - The month packages are never offered to customers: a 30-day Large van shows €2,016 instead of the €1,550 package.
- Each price has a validity period (from / to), so seasonal prices can be prepared in advance.

Mileage

- Km included per day (100 km today; 10 km per hour for hourly rentals), per package, or **unlimited** (used today for the Small car at weekends).
- Extra km price (€0.35 incl. VAT today; €0.39 for the truck at weekends). Charged at return from the recorded km (manual reading at launch, tracker in Phase 3).

Options and fees

- Options priced **per day** (extra driver €9.90/day, baby seat €4/day, protection) or **fixed per rental** (airport/station delivery €60). Options can have a maximum number of billable days. The same option prices apply to every category by default; LOCAZ can change them per category in the admin.
- Protection levels (daily), named **Standard / Comfort / 0 Franchise** everywhere: *Standard* included (liability capped at €3,000 per claim), *Comfort* €19/day (€500 for the first claim), *0 Franchise* €34/day (€0 for the first claim). Theft, fire and glass are excluded, as in the CGV.
- One-way fee when the return place differs from the pickup place (€59 between Gare / Aéroport / Ville today, both directions).
- Place fee for pickup/return at a specific place (currently €0).

Dynamic pricing (P2) Simple rules managed by the admin: +/- % or fixed amount by date range (e.g. Cannes Festival, Monaco Grand Prix, summer), by category, by place, by day of week, or by how early the customer books. A "preview" shows the resulting price before saving.

Coupons (P2) Code, % or fixed amount, validity dates, usage limit.

VAT Prices are entered and displayed incl. VAT (20%). Insurance options carry their own VAT rate (0% in RentHub today — to confirm with the accountant).

Worked example (today's prices) — Medium van, pickup Monday 09:00 at Nice Ville, return Wednesday 09:00 at Nice Aéroport, with Comfort protection: rental 2 days €139.20 + protection 2 × €19 = €38 + one-way fee €59 = **€236.20** incl. VAT. 200 km included, then €0.35/km. Deposit: €1,500 (authorisation).

7.2 Availability

- A vehicle is available if it has no booking, maintenance or unavailability block overlapping the requested period, **plus a buffer** between rentals (cleaning/check time, configurable, e.g. 60 min).
- Availability is checked **per category**: the customer books a category, and a specific vehicle is assigned automatically (or by the operator). An operator can swap the vehicle later without changing the price.
- Vehicles can be limited to certain places or to a place group, and can return to a different place (one-way).
- Overbooking protection: the last vehicle of a category is locked during checkout.

7.3 Fleet management

Object	Main fields
Place group (city)	Name, colour
Place	Name, type (airport / station / city / port / other), address, GPS point, group, phone, email, available online (yes/no), pickup/return fee, VAT rate, safety radius (for GPS return check), instructions/photos for finding the vehicle
Brand	Name, logo
Type	Car / Van / Truck; check-in required (yes)
Category	Name (FR/EN), type, display order, description, photo
Model	Name ("Renault Master or equivalent"), brand, category, fuel, gearbox, seats, doors, air-con, tank litres, load volume m ³ / payload (vans), towbar, photos, hidden online (yes/no), deposit amount , deductibles (damage, theft/fire, liability)
Vehicle	Plate, VIN, model, colour, current km, status (active / inactive / maintenance), date added / removed, available online, allowed places, GPS device ID, lock box ID, remote engine block (yes/no), documents (registration, insurance), deadlines (MOT, service, insurance) P2 , expenses P2

Today's data: 7 categories, 8 models, 5 vehicles, 4 places. It is imported from the RentHub export (Section 12).

7.4 Fleet calendar and reservations (admin)

The calendar is the main admin screen ("the most important line for me").

- **Planning view:** one row per vehicle, grouped by category; days (or hours) as columns; bookings as coloured bars by status; maintenance/unavailability blocks shown differently. Navigate by day, week and month; filter by type, category, place, fuel, gearbox, status.
- Counters per day: vehicles available / booked / blocked.
- **Drag and drop** to move a booking to another vehicle of the same category.
- **Create a booking from the calendar** (phone or walk-in customer): same price engine, with manual discount/override (reason required), send the customer a link to complete verification, contract and payment on their phone (the Contrazy link).
- **Booking detail** (tabs, simplified from RentHub's 13 tabs):
 - Status & price breakdown
 - Customer & drivers
 - Options
 - Documents & verification
 - Contract & signature
 - Payments & deposit
 - Pickup / return checks (photos, km, fuel, damages)
 - Extra charges
 - Dispute
 - History (audit log)
- **Statuses:** *Pending payment* → *Confirmed* → *In progress* (picked up) → *Returned* (return check done) → *Closed* (final charges settled, deposit released). Also *Cancelled* (with mandatory reason) and *No-show*.
- **Unavailability blocks:** reason (maintenance, repair, cleaning, internal use...), dates, vehicle.
- **Internal movements** (P2): move a vehicle between places without a customer.
- Search by plate, customer name, booking number.

7.5 Customers

- Customer list with search: name, email, phone, number of rentals, total spent, verification status, blacklist flag.
- Customer page: identity & licence (from Contrazy), drivers, bookings, payments, disputes, internal notes.
- **Blacklist** with coloured reasons (today: Smoker ●, Dirty, Fuel not refilled). A blacklisted customer cannot book online; the admin sees a warning on phone bookings.
- Company customers (P2): company name, SIRET, VAT number, invoice to the company.
- GDPR: export and delete a customer's data on request, with the retention periods from the LOCAZ privacy policy (identity documents 12 months after last check, GPS/telemetry 60 days after rental, inspection photos 6 months, invoices 10 years).

7.6 Rental operations: pickup, return and extra charges

Pickup and return use the **Contrazy check-in/check-out** flow. It already supports photos, numbers, choices and files per step.

- **Pickup check (mandatory before unlocking)**: 10 photos minimum (RentHub setting) following a guided sequence (4 sides, 4 corners, dashboard with km and fuel, interior), km reading, fuel level, existing damages marked on a car diagram (Scratch = X, Dent = O).
- **Return check (mandatory)**: same photos, km, fuel, keys returned to the glove box, return place confirmed.
- **Automatic calculation at return** (the operator confirms before charging):
 - Extra km: $(\text{km driven} - \text{km included}) \times \text{extra km price}$.
 - Fuel: if the level is lower than at pickup, **€36 + €3.50 per litre** missing.
 - Late return: **30-minute tolerance**, then **one extra rental day** (CGV article 3.3). Not returned 2 h after the end without an extension = non-return procedure (CGV article 12).
 - Return outside the zone: €150 + repatriation cost.
 - Cleaning: light / medium / heavy = €35 / €50 / €130; extreme cleaning €250.
- Charges are **taken from the deposit** first, then from the customer's card for any balance (RentHub setting: "take fees from the deposit and the balance from the customer's card"), with an itemised receipt sent to the customer.
- Damages and fines follow the dispute process (7.8).

7.7 Payments and deposit

All money flows through **LOCAZ's own Stripe account**, connected to Contrazy (Stripe Connect). LOCAZ is paid directly by Stripe.

- **Rental payment**: charged in full at booking (card, Apple Pay / Google Pay), 3-D Secure forced (RentHub setting).
- **Deposit**: €1,500 per model today (configurable per model and per protection option). It is an authorisation — the money is blocked, not debited — on a card in the renter's name. How long it is held is explained below.
- **Saved card**: the card is saved by Stripe at checkout (`setup_future_usage = off_session`), with the customer's explicit consent. LOCAZ never stores card numbers. The card stays available after the deposit is released, so fines, damages or extra km that arrive weeks or months later can be charged (see below).
- **Refunds** follow the cancellation rules automatically.
- **Extensions and extra charges** are paid by card; the invoice is updated.

Deposit hold for the whole rental

- Every deposit requests a **30-day extended authorisation** from Stripe. Card networks allow this for vehicle rental (Visa, Mastercard, American Express). LOCAZ's Stripe account must be registered as car rental and be on IC+ pricing, or have the feature enabled by Stripe support.
- If a card is not eligible (for example Maestro), the hold is valid for 7 days. For rentals longer than that, the platform **re-authorises automatically** before the hold expires, using the saved card, and then releases the previous hold.
- If a new hold fails (card limit reached, card blocked), LOCAZ and the customer are alerted immediately and the rental is flagged in the calendar.

Charges after the rental (fines, damages, extra km)

- They are charged to the saved card as **off-session, merchant-initiated payments**, with the evidence attached to the booking.
- The bank may still ask the customer to confirm, because SCA exemptions are decided by the bank. In that case the customer automatically receives a secure payment link, and the case continues as a dispute if unpaid.
- Payment data is kept for the period in the LOCAZ privacy policy (transaction + 13 months). This covers fines that arrive up to several months later.
- The CGV (article 7) already allow LOCAZ to charge amounts due after the rental. The checkout consent makes it explicit. The CGV mention of "Swikly" will be replaced by Stripe.

7.8 Damages, fines and disputes

Uses the **Contrazy dispute module** (already built: dispute record, statuses Open / Under review / Resolved / Lost, evidence pack as a ZIP with contract, photos and logs).

- The operator opens a dispute from a booking: damage, fine (PV), towing (fourrière), accident, non-return, other.
- Amounts are suggested from the **LOCAZ damage and penalty scale** (CGV annexes 1 and 2), stored as an editable list in admin. Examples: scratch 2–5 cm €250, bumper repair €450, lost key €600, undeclared damage €90, GPS tampering €1,000, fine handling €25, towing actual cost + €90, dispute handling fee €72 excl. VAT (RentHub setting).
- The protection option chosen caps the customer's liability automatically (Standard €3,000 / Comfort €500 first claim / 0 Franchise €0 first claim).
- The customer is notified with evidence (pickup vs return photos) and can respond. Payment is taken from the deposit or requested by card.
- Fines (ANTAI): as a rental company, LOCAZ must **designate the driver within 45 days** (otherwise ANTAI fines the company €675). The platform prepares the designation details from the booking, so the fine goes to the customer directly. LOCAZ then charges its €25 handling fee to the saved card.

7.9 Users, roles and security

- Invite staff by email; roles as in Section 4; deactivate at any time.
- Two-factor authentication for Super admin and Administrators.
- Full audit log (who changed which price, booking or setting, and when).

7.10 Company settings

One settings page, grouped by topic, replacing RentHub's ~30 configuration panels. Launch values come from RentHub and the CGV:

Group	Settings (current value)
Company	Name LOCAZ SAS, SIREN 994 107 696, VAT FR94994107696, APE 7711A, address 22 Avenue Robert Schuman 06000 Nice, email, phone, logo, website
Booking rules	Minimum age (21), licence held (1 year), max length (30 days), book ahead (6 months), minimum notice (60 min), minimum price (€35), buffer between rentals, hourly rental on/off per category
Return	Late tolerance (30 min), late penalty (1 day), fuel refill (€36 + €3.50/L), out-of-zone fee (€150), mandatory photos at pickup/return (10), fuel and km mandatory (yes)
Deposit	Default amount, 30-day extended hold (yes), automatic re-authorisation (yes), release automatically after return (yes), release delay
Payments	3-D Secure forced (yes), accepted methods, VAT rates
Cancellation	Refund tiers (24 h / 1 h), reason mandatory (yes)
Documents	ID required (yes), licence required (yes), proof of address (when requested), selfie check (yes)
Legal	CGV version, rental contract template (managed in Contrazy), privacy policy link
Notifications	Sender email, admin alert emails, WhatsApp (P3)

7.11 Notifications

Email at launch (the Resend provider is already used by Contrazy); SMS/WhatsApp in P3.

When	To	Content
Booking created, payment pending	Customer	Link to finish verification and payment
Booking confirmed	Customer + admin	Details, place, time, how to find the vehicle
24 h and 1 h before pickup	Customer	Reminder, pickup check instructions
1 h before end	Customer	Return reminder, how to extend
Late return	Customer + admin	Warning, then penalty notice
Return processed	Customer	Final receipt, extra charges, deposit release
New dispute / fine	Customer	Evidence and amount
Vehicle deadlines (P2)	Admin	MOT, service, insurance due

7.12 Reports (P2)

Dashboard with the essentials: bookings and revenue by day/month, occupancy rate per category and per vehicle, average rental length and price, top options, cancellations, open disputes.

8. Contrazy integration

LOCAZ becomes a Contrazy vendor (a business account). Each confirmed booking creates a **Contrazy transaction** with the rental amount, deposit, documents required, contract and check-in/out steps. The customer completes these steps in a LOCAZ-branded flow (LOCAZ logo and name), then returns to the LOCAZ site.

8.1 What Contrazy already provides

Need	Contrazy today
ID, passport, proof of address, driving licence upload	Yes — document requirements (ID, proof of address, driver licence, custom)
Identity check with selfie	Yes — Stripe Identity (optional per transaction)
Contract with customer data, e-signature, signed PDF	Yes — contract templates with merge fields, signature pad, signed PDF
Rental payment + deposit in one flow	Yes — "hybrid" transactions (payment + deposit) on the vendor's Stripe account
Deposit capture (full/partial) or release	Yes
Long deposits (8–30 days)	Partly — today by charge & automatic refund. Replaced for LOCAZ by extended authorisation + re-authorisation (see 8.2)
Pickup / return reports with photos, km, fuel	Yes — check-in / check-out reports (text, number, choice, photo, file fields)
Disputes with evidence pack	Yes
Audit trail and emails	Yes
French / English	Yes

8.2 What we add to Contrazy (small extensions)

Extension	Why
Partner API with secure API keys	So the LOCAZ platform can create and read transactions automatically (today transactions are created from the Contrazy dashboard)
Webhooks to LOCAZ	Tell LOCAZ when documents are approved, the contract is signed, payment/deposit succeeded, check-in/out is submitted, or a dispute changes
Return link	Send the customer back to locaz.co/booking after each step
Rental fields in the contract	Vehicle, plate, category, pickup/return place and date-time, km included, extra km price, options, protection level, fuel and km at pickup
Start/end date-time on transactions	Today a transaction has a single service date
Extra charges after return	Charge extra km, fuel, late fees from the deposit or card, with an itemised receipt
Re-use verified documents	A returning customer does not upload the same licence twice while it is valid
Extended deposit hold + automatic re-authorisation	Hold the deposit for the whole rental (30-day extended authorisation, or re-authorisation every 7 days)

Extension	Why
Saved card and off-session charges	Save the card at checkout and charge fines, damages and extra km after the rental, with a payment-link fallback
ANTAI driver designation export	Driver details ready to submit within the 45-day legal deadline

These extensions are general-purpose: they also make Contraazy sellable to other rental businesses.

9. Vehicle devices (Phase 3)

The goal is 100% keyless rental. Two devices are planned (final choice by LOCAZ after supplier meetings):

Device	Purpose	Candidates discussed
Key box (battery, Bluetooth, placed in the car with the key)	Lock / unlock from the app, no wiring	Supplier shared by LOCAZ by email (API documentation and test access received)
Plug-in tracker (OBD port, plug & play)	GPS position, mileage, fuel level	Teltonika (e.g. FMB003 OBD), Invers

What we prepare from Phase 1 (so nothing needs redesign):

- Each vehicle stores its **key box ID** and **tracker ID**.
- A device layer in the LOCAZ API with one standard set of actions — *unlock, lock, get position, get km, get fuel* — and one adapter per supplier, so suppliers can be changed later.
- Access rules: unlock works only for the renter, only between pickup and return time, only after the pickup check is complete and the deposit is authorised.

What devices add in Phase 3

- Unlock/lock from the booking page (web) and later from the mobile app.
- Automatic km and fuel at pickup and return (no manual reading; manual stays as a fallback).
- Live fleet map in admin; alert when a vehicle leaves the allowed zone or is not returned 2 h after the end (CGV article 12).
- Return place check with the place's safety radius.
- Remote engine block (RentHub shows it active on 4 vehicles) — only if supported by the chosen device and legally allowed.

10. Mobile app and public API (Phase 4)

- Everything the website does goes through a **documented API** (OpenAPI/Swagger), so a mobile developer can build the iOS/Android app without changing the backend.
- The web booking site is **mobile-first** from day one and installable on the phone (PWA), so LOCAZ is usable on mobile before the native app exists.
- The native app adds: Bluetooth unlock (if the key box requires it), push notifications, guided photo capture, and "find my car" navigation.

11. Non-functional requirements

Topic	Requirement
Mobile first	Designed for phones first; every step usable with one hand; fast on 4G
Performance	Search results in under 2 seconds; price updates instantly when options change
Availability	24/7 service; hosted on Vercel with a managed PostgreSQL database in the EU; daily backups
Security	HTTPS everywhere; card data never touches LOCAZ servers (Stripe); documents stored encrypted; 2FA for admins; role-based access; rate limiting on login and booking
GDPR	Consent and privacy policy; retention periods as in the LOCAZ privacy policy; data export/deletion on request; EU data hosting where possible
Languages	French (default) and English; Italian P2
SEO	Landing page stays static and SEO-optimised; booking pages have clean URLs and metadata per place/category (e.g. "Location utilitaire Nice Aéroport")
Scalability	Multi-city ready (place groups); no hard limit on vehicles
Traceability	Audit log for bookings, prices, settings and payments

Technology

Same proven stack as Contrazy, to share code and skills: Next.js (web + API), PostgreSQL with Prisma, Stripe, Cloudinary (photos/documents), Resend (email), hosted on Vercel.

The LOCAZ platform lives in the same code repository as Contrazy, as a separate application. Everything stays on **one domain**: the existing landing page at `locaz.co`, and the booking platform at `locaz.co/booking` (Vercel rewrites / multi-zones). The domain's DNS moves from GoDaddy hosting to Vercel at launch. One domain is also better for SEO.

12. Data migration from RentHub

The RentHub account was reviewed and exported on **27 September 2026**, before access ends. The export (CSV files, screenshots and raw data) is in the `LOCAZ-RentHub-Export-2026-09-27` folder:

- Fleet: 7 categories, 3 types, 7 brands, 8 models, 5 vehicles (plates, km, deductibles), 4 places.
- Pricing: 4 price lists, all rates per category and duration, 2 packages, service prices, one-way fees.
- Rules: company settings, blacklist reasons, document and licence types, damage markers, cost types.

These are imported into the new platform during Phase 1.

Customer records, reservations and invoices were **not** exported, because they contain personal data. They can be exported on LOCAZ's request while RentHub access still works.

Data issues found in RentHub (LOCAZ will set the final prices in the admin after development; vans and trucks get the car option prices by default)

- Service and insurance prices exist only for **Small** and **Medium cars**. Vans and the truck have no option prices.
- The **Small van weekly package** expired on 11/07/2026.

- **Medium car** has prices but no model or vehicle.
- The **Small car weekend** price is €80/day with unlimited km (weekday: €39.90 with 100 km/day). LOCAZ will set the final price in the admin.
- **Month packages are never applied** on the booking page. A 30-day rental shows €1,800 (Small van), €2,016 (Large van) or €2,550 (truck) instead of the €1,000 / €1,550 / €1,600 packages.
- The **truck week package** (€672) costs more than 7 daily prices (€595).
- The website says "from €29/day", but the lowest daily price in RentHub is €39.90 and the minimum booking is €35.

13. Delivery plan (proposal)

Phase	Content	Target
0 — Kick-off	PRD approval; LOCAZ Stripe account (car rental category, extended authorisation enabled); device supplier choice	Early October 2026
1 — Admin core	Company settings, users & roles, places, opening hours, categories, models, vehicles, price engine (daily, weekend, hourly, packages, km, options, one-way), fleet calendar, manual bookings, customers & blacklist, RentHub data import	October – November 2026
2 — Booking & Contrazy	Public booking site at locaz.co/booking (search → options → account → Contrazy verification/contract/payment → confirmation), customer area, Contrazy Partner API & webhooks, saved card, extended deposit hold & re-authorisation, pickup/return checks, extra charges, disputes & ANTAL designation, emails, invoices	November – December 2026
3 — Devices	Key box lock/unlock, tracker (GPS, km, fuel), fleet map, zone and late-return alerts	December 2026 – January 2027
Pilot launch	Nice, current fleet, real customers	January 2027
4 — Growth	Public API documentation for the mobile app, dynamic pricing, coupons, "request a quote", reports, WhatsApp/SMS, vehicle deadlines & expenses, second city	From Q1 2027

Each phase ends with a demo and LOCAZ's acceptance before the next one starts. Phase 3 dates depend on device delivery and supplier API access.

14. Decisions confirmed by LOCAZ (1 October 2026)

#	Topic	Decision
1	Driver requirements	Minimum age 21, licence held for at least 1 year
2	Late return	30-minute tolerance, then one extra rental day
3	Fuel refill	€36 + €3.50 per litre
4	Deposit for long rentals	30-day extended hold; automatic re-authorisation every 7 days when a card is not eligible
5	Protection names	Standard / Comfort / 0 Franchise, everywhere
6	Option prices for vans and trucks	Same as cars by default; LOCAZ sets final prices in the admin
7	Hourly rental	Online from launch (P1)

#	Topic	Decision
8	Airport/station delivery	Kept at launch, fixed fee and opening hours
9	Selfie identity check	Every customer
10	Device suppliers	Chosen by LOCAZ after supplier meetings
11	Domain	locaz.co/booking, same domain as the landing page
12	Month package	One for every category
13	Truck week package and all prices	Set by LOCAZ in the admin after development
14	"Request a quote"	Kept, P2
—	Charges after the rental	Card saved at checkout (off-session); fines handled by ANTAL driver designation + €25 fee

Documents to align with these decisions (LOCAZ side; we can provide the exact wording):

- website FAQ: licence 1 year;
- CGV: fuel €36 + €3.50/L, protection names, saved-card consent, Stripe instead of Swikly;
- website: the "from €29/day" claim, to match the real prices.

15. Next steps

1. **LOCAZ** approves this PRD and the budget, and pays the upfront amount.
2. **LOCAZ** opens or confirms its Stripe account (car rental category, extended authorisation enabled), and shares the device supplier's API access when chosen.
3. **Development starts** with Phase 1 (admin core) and the import of the RentHub data.
4. **Demo at the end of each phase**; pilot launch in January 2027.

Appendix A — Current LOCAZ configuration (from RentHub, 27 Sept 2026)

A.1 Daily prices — weekday (incl. VAT, 100 km/day included, extra km €0.35)

Category	1 day	2 days	3 days	4 days	5 days	6 days	Week pkg (700 km)	Month pkg (3,000 km)
Small car (Twingo / Aygo)	39.90	78.50	115.50	—	—	—	223.44	— (7+ d: 31.92/d; 30+ d: 30.00/d)
Medium car	44.90	88.50	129.90	169.90	—	—	290.00	—
Large car (Fiat 500X)	49.90	95.00	140.00	180.00	—	—	290.00	—
Small van (Citan)	65.00	127.20	187.20	244.80	300.00	360.00	350.00 (expired)	1,000.00
Medium van (Trafic)	70.00	139.20	205.20	268.80	330.00	388.80	360.00	1,350.00
Large van (Master / Daily)	75.00	146.00	208.80	273.60	342.00	403.20	370.00	1,550.00

Category	1 day	2 days	3 days	4 days	5 days	6 days	Week pkg (700 km)	Month pkg (3,000 km)
Tipper truck (Cabstar)	102.00	198.00	285.00	364.00	440.00	510.00	672.00	1,600.00

"—" means no price is set for that duration. The daily rate of the last tier applies, e.g. Small car 5 days = 5 × €38.50 = €192.50, Large car 10 days = 10 × €45 = €450. Prices checked against the live RentHub booking page on 27 Sept 2026.

A.2 Weekend daily prices (incl. VAT)

Category	1 day	2 days	Other
Small car	80.00 (unlimited km)	—	
Large car	65.00	—	
Small van	80.00	156.00	
Medium van	75.00	144.00	3–6 days: 212.40 / 278.40 / 342.00 / 403.20
Large van	85.00	160.00	
Tipper truck	120.00	230.00	extra km €0.39

Hourly prices exist for Small car (€19.90/h) and for vans/truck (€30–39 for the first hour, 10 km/h included). They are not shown online.

A.3 Options (incl. VAT — today's car prices, applied to every category by default)

Option	Price	Charged
Standard protection	Included (mandatory)	—
Comfort protection	€19	per day
0 Franchise protection	€34	per day
Extra driver	€9.90	per day
Baby seat	€4.00	per day
Delivery to airport / station	€60.00	once
Hand truck (diable)	no price set	—

A.4 Places and one-way fees

Place	Type	Address
Nice Gare	Station	Avenue Thiers, 06000 Nice
Nice Aéroport	Airport	19 Rue Costes et Bellonte, 06200 Nice
Nice Ville	City	11 Avenue Auber, 06000 Nice
Nice Collinettes	Other	22 Rue Robert Schuman, 06000 Nice

One-way fee: **€59** for Gare ↔ Aéroport, Ville ↔ Aéroport, Gare ↔ Ville (both directions).

A.5 Fleet

Model	Category	Fuel / gearbox	Seats	Deposit	Deductibles (damage / theft-fire / liability)
Renault Twingo or equiv.	Small car	—	4	€1,500	€1,500 / €2,500 / €1,500
Toyota Aygo or equiv.	Small car	Petrol, manual	4	€1,500	same
Fiat 500X or equiv.	Large car	Petrol, automatic	5	€1,500	same
Mercedes Citan or equiv.	Small van	Diesel, manual	2	€1,500	same
Renault Trafic or equiv.	Medium van	—	3	€1,500	same
Renault Master or equiv.	Large van	Diesel, manual	3	€1,500	same
Iveco Daily or equiv.	Large van	Diesel, manual	3	€1,500	same
Nissan Cabstar or equiv.	Tipper truck	Diesel, manual	3	€1,500	same

5 vehicles are registered: Iveco Daily, Fiat 500X, Mercedes Citan, Toyota Aygo and Nissan Cabstar. They are available at all 4 places.

A.6 Reference lists

- **Blacklist reasons:** Smoker, Dirty, Fuel not refilled.
- **Required documents:** ID card, passport, proof of address (less than 3 months old); licence types: international licence, other.
- **Damage markers:** Scratch (X), Dent (O).
- **Vehicle cost types:** Washing, Energy, Service, Insurance, Tyres.

Appendix B — Glossary

Term	Meaning
Category	Group of equivalent vehicles priced the same (e.g. Large van)
Model	"Renault Master or equivalent" — what the customer sees
Vehicle	One physical vehicle with a plate
Place / place group	Pickup/return point / city
Package	Fixed price for a week or a month with a km allowance
Deposit (caution)	Amount blocked on the customer's card during the rental
Deductible (franchise)	Maximum the customer pays per claim, depending on the protection chosen
One-way fee	Fee when the vehicle is returned to a different place
Check-in / check-out	Pickup / return inspection with photos, km and fuel
Contrazy	LOCAZ's platform for identity, contract, signature, payment, deposit and disputes
